

**La SIA S.p.A. awarded by OICE
The Digital Twin of Città dello Sport is the best BIM project
of the last three years**

Rome, June 26, 2025 – La SIA S.p.A. ('La SIA' or the 'Company'), part of Mare Group and operating in the engineering & design sector, whose shares are traded on Euronext Growth Milan, announces that it has been awarded by OICE as the winner of the best BIM project of the last three years – Category B11 – thanks to the creation, through Scan to BIM, of the digital twin of Città dello Sport, also known as Vela di Calatrava, located in Rome in the Tor Vergata district, and the drafting of the PFTE for its first use during the Giubileo dei Giovani.

The award ceremony took place during the third edition of the OICE Awards, the prestigious competition aimed at recognising and promoting the best organisational and design companies at national level, highlighting technical excellence, design quality, environmental sustainability and innovation.

Vela di Calatrava, redeveloped through surveying, BIM modelling and the drafting of the PFTE to host the Giubileo dei Giovani from 28 July to 3 August, will be inaugurated in the first half of July.

In particular, in the step dedicated to the Scan to BIM of the Vela, advanced technological know-how was used to translate the survey phase into high-definition digital data, aimed at creating a complete virtual representation of the structure and the 46 hectares of surrounding land. This activity provided a solid information base to support the analysis of the site, its maintenance and potential future developments.

Mario Rampini, Technical Director of La SIA, commented, "*The Tor Vergata Città dello Sport is a symbol that is being reborn, and we at La SIA are proud to have contributed to the renovation of this structure, also known as Vela di Calatrava, through surveying, BIM modelling and the drafting of the PFTE for its first use. It was a complex project, full of meaning, which allows an unfinished work to finally come to life. I would like to thank all my colleagues who worked with me with passion to give back such an iconic work to the city.*"

The Company

La SIA S.p.A. is an innovative SME, part of Mare Group, operating in the engineering and design sector, specialising in the design of infrastructure in the fields of telecommunications, civil construction, mobility infrastructure and energy plants, using cutting-edge technologies and specific know-how. La SIA is among the first movers in the introduction of BIM (Building Information Modelling) methodology, also used for safety, predictive maintenance and the protection of the country's artistic and historical heritage. The company, established in 2004 and acquired by Mare Group in 2025, operates in the architectural, structural and plant design of complex buildings, in the management and design of infrastructure related to energy, road and rail networks, in the design of medium-voltage and photovoltaic systems, and in the design and construction of fibre optic and mobile radio networks.
